<p>Remember the layout conventions that have been adopted throughout the questionnaire.</p> <p>Instructions to the interviewer: these are given in <b>UPPER CASE TEXT</b> and should not be read out.</p> <p>Introductions to the sections: these are given in emboldened lower case text and should be read out.</p> <p>Questions: these are given in lower case letters and must be read exactly following the wording. <b>DO NOT paraphrase</b>. Text in parentheses is optional.</p> <p>In the following pages the questionnaire is documented in the left-hand column. Notes to help administer the questionnaire are given in the right hand column.</p>	
<p><b>Thank you for agreeing to be seen again. The purpose of this interview is to find out how you've been since we last talked to you.</b></p> <p><b>Your help is extremely valuable to us and of course any information you provide will be treated in strictest confidence. This time, many of the questions are about your health and day-to-day activities, and if there have been any changes, particularly since we last saw you.</b></p> <p><b>Again there is a section on memory, concentration and things like that.</b></p>	
<p>Q1 How have you been since we last saw you? Has anything (major) happened (since we last saw you) that you would like to tell me about?</p> <p>Textual answer</p>	<p><b>Enter brief notes here</b></p>

Not asked</p>	<p>Q82 Rate feelings of sadness, being miserable and low-spirited. Older people may not understand the term depression. They may, therefore, respond to one of the other terms. Do not rate if the term depression is used to describe a mood which is distinct from clinical depression e.g. boredom. You are not concerned here with minor changes.</p> <p>When depressive mood is very severe it pervades all of the individual's mental activity. About one third of older people deny</p>

<p>IF =2 ASK Q83, Otherwise skip to Q84</p>	<p>depressive mood but clearly exhibit the other symptoms of depression.</p> <p>If R denies depressive mood it should be rated 0, but you should be vigilant for other signs of depression, especially evidence of depression on observation, and rate these later, if present.</p> <p>You must avoid assuming that because R is of an advanced age or is suffering from severe physical illness, that when depression is expressed it is a normal phenomenon. <u>Such depression should be rated on the value of the mood itself and not its association with age or illness.</u></p> <p>Depression must not be confused with nervous tension nor anxiety which may, however, coexist.</p>
